

# Alex Example — Curriculum Vitae

Synthetic test profile for the CONDYN manual workflow. Not a real person.

## Profile

Senior software engineer with eight years of experience building web platforms and data pipelines in logistics. Focus on TypeScript, React and Node.js, relational databases and automated testing.

## Experience

**Senior Software Engineer**, Nordwind Logistics GmbH, Hamburg — 2020 to 2026

- Built the customer billing platform in TypeScript and Node.js with Express; migrated 40 services to strict TypeScript.
- Implemented the React dashboard used by 300 dispatchers, including accessibility fixes against WCAG 2.1.
- Designed the PostgreSQL schema for orders and invoices and wrote complex SQL reporting queries.
- Introduced test-driven development with Jest and raised unit test coverage from 35% to 80%.
- Set up CI/CD pipelines with GitHub Actions and built Docker images for every service.
- Led a team of four engineers and ran the weekly architecture review.

**Software Developer**, Datenwerk AG, Berlin — 2017 to 2020

- Wrote Python ETL jobs that load shipment events from Apache Kafka into the data warehouse.
- Modelled the dimensional data model for monthly carrier reports.
- Deployed services to a Kubernetes test cluster and maintained Linux build agents.

## **Education**

B.Sc. Computer Science, Technische Universität Berlin, 2017. Thesis: event stream processing for parcel tracking.

## **Skills**

TypeScript, JavaScript, React, Node.js, Express, PostgreSQL, SQL, Python, Apache Kafka, Docker, GitHub Actions, Jest, Kubernetes (basic), Linux.

## **Languages**

German (native), English (C1).

## **Certifications**

None listed.
